* Coverage rates vary based on flooring product, ambient conditions, substrate porosity and trowel/applicator size

**Product is subject to \$5 broken carton charge when not ordered in full carton quantities

***TP-620 is packaged in mini-cartons and master cartons (not on pallets)

+ AIR RESTRICTION - must be shipped ground only

++ HAZARDOUS MATERIAL - must be shipped via FedEx Ground or LTL only

NOTES: • Acrylic Latex Caulk is available in colors to match all flooring, stair tread, wall base and accessory products

PRODUCT • Adhesive selections must be made based on the porosity of the substrate and the final usage of the space.

LIMITATION! • Refer to Adhesive Chart for specific adhesive recommendations based on product and substrate type.

• For a complete list of product limitations, please see each products technical data sheet.

RECOMMENDED EXCELSIOR ADHESIVES

FOR WARRANTY COVERAGE

DISCLAIMER: The adhesive recommendations on this page are general guidelines only. Refer to each individual product's Technical Data Sheet for current, complete adhesive recommendations, warnings and cautions depending upon substrate and installation type before ordering adhesive or making formal recommendations.

NOTE: All substrates must be approved for use with the adhesive and properly prepared per each individual products technical data sheet prior to adhesive installation.

RUBBER & VINYL WALL BASE

For Interior Use Only

Product Description	Porous Substrates (Concrete, Drywall, Dry Plaster, Masonry and Exterior Grade Plywood - Group 1, cc Type)	Non-Porous Substrates (Metal, FRP, Resinous Materials, Epoxy Paints)
All rubber and vinyl wall base/corners	AW-510, WB-600, C-630	C-630

NOTE: WB-600 Spreader Nozzle #186 must be used when installing WB-600

TILE

RUBBER FLOORING

For Interior Use Only

Product Description	Approved Porous Substrates (Concrete, Wood, Cementitious Materials)	Approved Non-Porous Substrates (Metal, Resinous Substrates)	Existing Stone Flooring (Tarrazzo, Ceramic, Porcelain)	Existing Vinyl Flooring (VAT, VCT, SVT, Quartz Tile, Sheet Vinyl)

PTG-8030

Resilient Adhesive

Pricing:	Size	Retail	Wholesale	Quantity Price Break
	Gallon	\$37.19	\$24.79	
	4 Gallon	\$139.99	\$92.99	\$81.99/pallet

Packaging: Gallon Unit: 4 gallons/case, 36 cases/pallet, 144 units/pallet
4 Gallon Unit: 36 units/pallet

Coverage:	Flooring	Trowel Size	Coverage sf/gallon
	Modular Carpet Tile	1/16x1/32x1/32"U-	220-260
	LVP, LVT, Sheet	1/16x1/32x1/32"U-	220-260

PTG-8030 is a solvent-free adhesive with extremely aggressive tack. PTG-8030 contains an anti-microbial system for enhanced resistance to mold and mildew. When used with LVT, plank, and vinyl sheet flooring, PTG-8030 provides a tenacious, permanent bond. When used with carpet tiles in a dry install, this adhesive is formulated for releasing and re-bonding while permanently retaining its tack, allowing individual tiles to be lifted out easily and replaced without substantial loss of adhesive properties.

Before you begin:

Important: proper substrate preparations are essential. Moisture testing must be performed and documented before installation begins. Read Technical titled Substrate Preparation for complete instructions before beginning installation. This document may be obtained by calling 800-804-9644.

Installations:

Follow the flooring manufacturer's installation instructions and guidelines regarding adhesive application rate and method. Always roll the installation in both directions with a 75-100lb 3-section roller (or roller specified by manufacturer) immediately after flooring is placed, ensuring complete contact with adhesive.

Installing Carpet Tile:

Spread the adhesive with an appropriate trowel or paint roller, and allow to dry completely before placing tiles for a releaseable installation. Drying time is approximately 30 minutes, depending on ambient humidity and temperature. Use a 1/16"x1/32"x1/32" U-notch trowel, 3/8" nap roller, or flat trowel. Coverage will be approximately 220-260 sf /gallon or 350-400 sf/gallon for roller or flat trowel applications.

PTG-8030

Resilient Adhesive

Installing over porous substrates:

Vinyl sheet flooring may be placed into adhesive after 10–20 minutes open time (flash-off) over a porous substrate. Roll the installation in both directions with a 75-100 lbs. 3-section roller immediately after flooring is placed and positioned, ensuring complete contact with adhesive. When installing vinyl plank and tile over a porous substrate, the adhesive should be allowed to dry to the touch sufficient to prevent slippage. Loss of adhesion can result if the flooring is not installed within the working time of the adhesive. Use a 1/16"x1/32"x1/32" U-notch trowel. Coverage will be approximately 220-260 sq. ft./gallon.

Installing over non-porous substrates:

Install vinyl sheet, tiles and plank flooring into adhesive as it becomes dry to the touch with little or no transfer to finger when touched. This will normally require 30–60 minutes of drying time at suggested installation temperature and humidity. Do not install flooring into wet adhesive on non-porous substrates. Use a 1/16"x1/32"x1/32" U-notch trowel. Coverage will be approximately 220-260 sq. ft./gallon.

Traffic:

Follow the flooring manufacturers's installation guidelines; otherwise restrict foot traffic for 24 hours after installation. No heavy traffic, rolling loads or furniture placement for 72 hours after installation. Additional time may be necessary if the installation is over a non-porous substrate. Allow at least five days following the installation before conducting wet cleaning procedures or initial maintenance.

Clean-up:

Use a clean wet cloth to clean up adhesive while still wet. Dried adhesive may require the use of an appropriate solvent.

Substrate Conditions:

Use on concrete substrates with up to 90% RH for resilient flooring installed on or above grade (per current ASTM F2170), and pH of 8.0–10.0.

Use with:

Vinyl-backed modular carpet tile, Non-vinyl- backed modular carpet tile, Luxury vinyl tile (LVT), Luxury vinyl plank (LVP), Resilient sheet vinyl, Vinyl composition tile (VCT), Fiberglass-reinforced sheet vinyl, Carpet cushion (to substrate).

Limitations:

Do not allow product to freeze. Do not use on substrates that have been chemically cleaned or over treated plywood. Do not use to install vinyl- backed flooring over asphalt-based (cutback) adhesive residues. It is up to the installer to determine proper adhesive application based on jobsite conditions.

PTG-8030

Resilient Adhesive

LEED v4 PROGRAM CREDITS (where applicable)

- IEQ Credit 2.1, 2.2: Low emitting materials
- VOC content is below that established by SCAQMD Rule 1168
- California Section 01350 compliant

revision: 04242018

supersedes: 041818

GHS PRODUCT IDENTIFIER:

Water-based adhesive

PRECAUTIONARY STATEMENTS:

In case of eye contact, flush with water for 10-15 minutes. If irritation persists contact a physician.

If prolonged skin contact causes irritation, wash with soap and water. If swallowed, consult a physician. Avoid release to the environment. Safety glasses and gloves are recommended if contact is expected. Dispose of in accordance with local, regional, national, international regulations as specified. Read SDS for detailed product information. SDS may be obtained by calling 800-804-9644.

SIGNAL WORD: None required

PHYSICAL HAZARDS: None

HEALTH HAZARDS: Mild skin irritant, mild eye irritant

HAZARD SYMBOL: None required

HAZARD STATEMENT: This material may cause slight irritation of the skin and eyes. May be an ingestion hazard. This product is not for human consumption. Use proper precautions.

PROP 65 STATEMENT: This product does not contain any chemicals known to State of California to cause cancer, birth defects, or any other re-productive harm.

SUPPLEMENTAL INFORMATION:

Shelf Life: 2 years from date of manufacture in unopened, properly stored container.

Avoid excessive heat or cold. PROTECT FROM FREEZING.

Store indoors at a temperature of 65°-95°F.

DOT Hazard Class: Unregulated.
